OUR PRODUCTS

1

GRID SYNCHRONIZED SYSTEM

It has no consumable parts, these systems have long shelf life and hassle-free working. All our systems are equipped with Tier-I components and can be customized as per customer's choice.

2

HYBRID SYSTEM

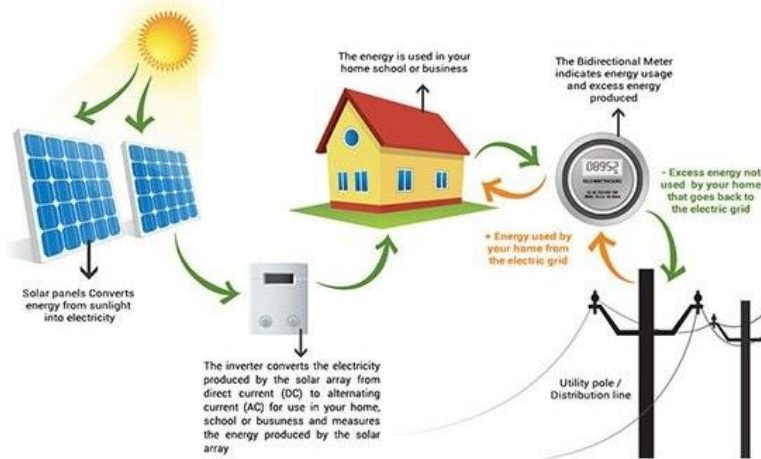

The system may be programmed to customize the timing and duration of battery charging, thereby, allowing flexibility to owners to fine-tune the usage of solar energy.

3

OFF-GRID SYSTEM

The systems come with various battery options and can be customized as per the back-up requirement. Excellent system performance, especially, for remote or critical operations.

SOLAR PLANT WORKING
